proGres v4 | What differs from previous versions?

ProGres v4

- **Online** built software
- Data **consolidated**
- Standard **workflows**
- Data structured around **entities** and grouped into **modules**
- Individuals organised into **Registration Groups** and processes into **cases**
- **Support partnerships** with shared data access and processing

proGres v4 | Core Concepts

Data is recorded in **Entities** which are grouped in **Modules**

Ownership of data is set by **Business Units**

Individuals are grouped into **Registration Groups**

An individual can be a member of **Case**

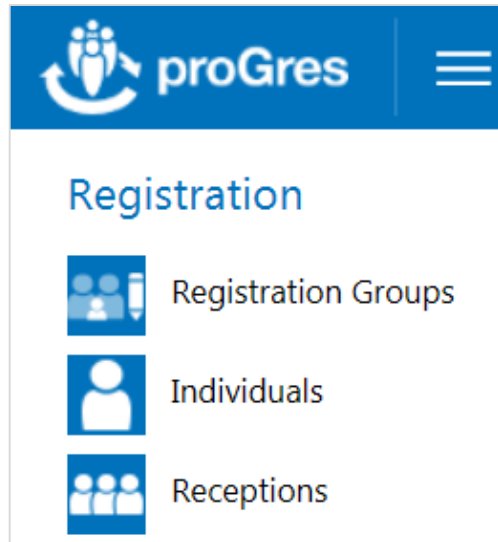

Cases have **Workflows** based on UNHCR standard processes

Core Concepts | Entities

- **Entities** hold related data.
- Some entities are considered as **main entities** in a process.
- The data is stored as **records** in the entities

Example:
Registration Module – *Main entities*

1. Registration Groups (Entity)
Stores all *Registration Group* records
2. Individuals (Entity)
Stores all *Individual* records
3. Receptions (Entity)
Stores all *Reception* records

Core Concepts | Modules

Entities are grouped according to the process that they are part of. The processes are displayed as Modules in proGres v4.

The following modules are available:

1. Registration
2. RSD
3. Statelessness (SSD)
4. Resettlement
5. Assistance
6. Repatriation
7. Legal and Physical Protection
8. Child Protection
9. SGBV
10. Fraud
